N;Alternate names: tumor-suppressor protein p53
C;Species: Bos primigenius taurus (cattle)
C;Date: 10.Sep-1999 #sequence_revision 10.Sep-1999 #text_change 10.Sep-1999
C;Accession: S51648
R;Dequidedt, F:, Willems, L.; Burny, A.; Kettmann, R.
Submitted to the EMBL Data Library, September 1994
A;Description: Nucleotide sequence of the ovine p53 tumor-suppressor gene cDNA and its q
A;Recence number: S51648
A;Status: preliminary
A;Accession: S51648
A;Status: preliminary
A;Residues: 1-386 ADEO
A;Cross-references: EMBL:X81704; NID:g602332; PIDN:CAA57348.1; PID:g602333
C;Keywords: apoptosis; cell division control; DNA binding; homotetramer: phosphoprotein;
F;168,171,231,235/Binding site: Zinc (Cys, His, Cys, Cys) #status predicted
F;385/Binding site: phosphoryl-RNA (Ser) (covalent) #status predicted

Patent No. 6387628

GENERAL INFORMATION:
APPLICANT: Little, Daniel
APPLICANT: Little, Daniel
APPLICANT: Migdins, G. Scott
APPLICANT: Moster, Hubert
APPLICANT: Lough, David
TITLE OF INVENTION: Mass Spectrometric Detection of Polypeptides
FILE REFERENCE: 2016C
CURRENT APPLICATION NUMBER: US/09/664,977A
CURRENT APPLICATION NUMBER: 09/146,054
PRIOR FILING DATE: 1998-09-02
PRIOR FILING DATE: 1998-09-02
PRIOR FILING DATE: 1997-09-02
NUMBER OF SEQ ID NOS: 9
SOFTWARE: PatentIn Ver. 2.0

COMMENT

Submitted (28-MAR-2002) Human Genome Sequencing Center, Department of Molecular and Human Genetics, Baylor College of Medicine, One Baylor Plaza, Houston, TX 77030, USA On Feb 27, 2002 Lils sequence version replaced gi:17933791.

INFORMATION: http://www.ngsc.bcm.tmc.edu/ or email gc-help@bcm.tmc.edu

CLONE LENGTH: This sequence does not necessarily represent the entire insert of this clone. Overlapping regions of clones are only sequenced and submitted once, so the sequence for the remainder of the insert may be found in the record for the adjacent clones. Overlapping clones are noted at the beginning and end of the Features listing.

ANNOTATION OF FEATURES:

Repeats are identified using RepeatMasker (A. Smit and P. Green, unpublished.) for Human and Mouse sequences. Genes and Region of sequence similarity are identified by BLAST (Nuc. Acids Res. 25:3389-3402) similarity (expect < 1e-34) to the EST and CDNA sequences. Genes demonstrate at least two exons STSs are identified using ePCR (Genome Res. 7:541-550) searches a local database that includes entries from dbSTS, GDB, and local mapping efforts.

repeat_region

flanked by consensus splice sites that maintained sequence continuity across the splice junctions. Sequences that are not identical matches are annotated as similar.

SEQUENCING READ COVERAGE:Sequencing is completed to a minimum standard of double strand coverage with a minimum of 2 clones and 2 reads with no ambiguities or 2 chemistries with a minimum of 2 clones and 3 reads with no ambiguities. If the sequence quality for a region does not meet this standard, it will be indicated in the annotation as Low Coverage.

standards - estimated error rate less than 1 per 10,000 bases. A seports of lowest quality individual bases and measures of base quality are listed below. Description of the metrics can be found at URL: http://gc.bcm.tmc.edu:8088/quality.info/genbank.annotation. QUALITY OF INDIVIDUAL BASES: This sequence meets stringent quality

Sequence 45, Application US/08267803B

Partent No. 5834183

GENERAL INFORMATION:
APPLICANT: Orr, Harry T.
APPLICANT: Chung, Ming-yi
APPLICANT: Cognbi, Huda Y.
TITLE OF INVENTION: Gene Sequence for Spinocerebellar Ataxia
Patent No. 5834183

TITLE OF INVENTION: Type 1 and Method for Diagnosis
NUMBER OF SEQUENCES: 85

CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ö
